WORK EXPERIENCE

Full stack developer
OnlyGamers/Inc

01/2024 - 04/2024 — Norway

Worked with a fast-growing startup, developing scalable web solutions tailored for the gaming community.

Achievements/Tasks
- Implemented manual sign-in/sign-up, Google OAuth, social OAuth providers, and custom authentication for enhanced security and user experience on a website.
- Designed a user-friendly interface for profile customization, including advanced cropping for banner and avatar images. Optimized image storage and retrieval using AWS S3 buckets.
- Implemented creator monetization through subscriptions, enabling content creation, video uploads, and content visibility management based on subscription status. Integrated payments and subscription management functionalities.
- Utilized AWS MongoDB for efficient data storage and implemented data management strategies for optimal performance and scalability as the platform grows.
- Implemented GraphQL APIs for seamless data retrieval from AWS backend to frontend, enhancing user experiences.

React Front-end Developer
Creative Squad Inc

01/2023 - 05/2023 — Canada,Ontario

Worked for Creative Squad, a digital marketing and web development company.

Achievements/Tasks
- Converted designs (UI) from Figma, ensuring responsivity.
- Integrated font-awesome, bootsrap5, swiper js for interactive UI/UX.
- Solved complex coding problems to keep the functionality.
